

PKC Group is a global partner, designing, manufacturing and integrating electrical distribution systems, electronics and related architecture components for the commercial vehicle industry, rolling stock manufacturers and other selected segments. The Group's manufacturing facilities on four different continents ensure a comprehensive service and production network.

Products and Services

PKC designs, manufactures and integrates tailored electrical distribution systems and related architecture components, vehicle electronics, wires and cables especially for trucks and buses, light and recreational vehicles, construction equipment and agricultural and forestry equipment. In addition, PKC designs and manufactures electrical cabinets, power packs and electrical distribution systems for leading rolling stock manufacturers.

PKC's strengths, mass customisation and the excellent skill to integrate into the customer's operating environment, provide a unique competitive advantage in the market. Product design and effective supply chain management are carried out in close cooperation with customers and in accordance with their requirements.

The added value that PKC provides its customers originates from PKC's own unique know-how. Our competence is composed of processes, tools, expertise and architecture components developed for complexity management, which enable mass production of high-quality, individually tailored products and their countless variations with short delivery times.
